Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2643

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7, 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Shibayama (US PAT. NO. 6,233,002).

Shibayama discloses a portable terminal having a camera (e.g. see Figs. 6a, 6b) comprising a jack interface (e.g. earphone jack at end of cord 28-2 in Fig. 6b) connected to an external device (e.g. remote control earphone and remote control unit 30 as shown in Figs. 6b, 6c) for selecting a command for controlling the portable terminal in either a camera or common (operation standby) mode; a control module (not shown but inherent, e.g. see col. 5 line 53 to col. 8 line 3) in order to respond to commands received from the remote control earphone, a storing module (e.g. a memory, not shown but inherent in order to store images taken by the camera as is old and well known in the art). Also see col. 10 line 10 to col. 11 line 56 for example.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shibayama.

As to claim 6, since Shibayama discloses each function has its own key, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify each key to have its own signal level in order to clearly indicate to the control module which function is being selected.

As to claim 8, to provide for additional jack interfaces would have been obvious to one having ordinary skill in the art at the time the invention was made to distinguish each signal send to the control module, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wing F. Chan whose telephone number is 571-272-7493. The examiner can normally be reached on Monday to Friday from 9 AM to 6 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on 571-272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
